

## Schools within the Athens Downtown Development Authority District

This map identifies the locations of schools registered in Clarke County within the Athens Downtown Development Authority (ADDA)'s service area. The roadway and school identification could show the ADDA where institutions of learning are, and this information could help them plan and zone the area accordingly. Through highlighting school locations, the business developers will be able to recognize where would be the best locations for adult businesses. The ADDA also is currently investing the possibility of creating a children's museum and other types of museums within the downtown district. Through knowing where the schools are located, the ADDA can maximize potential museum locations by their proximity to potential school partners.
